#### NOTES:

- 1) DIMENSIONS ARE IN INCHES (MM APPROX)
- 2) DIMENSIONS SUBJECT TO CHANGE NOT TO BE USED FOR CONSTRUCTION UNLESS CERTIFIED
- 3) GENERAL TOLERANCES APPLY, CONTACT FACTORY FOR DETAILS.
- 4) SHELL IS DESIGNED TO ACCOMODATE BOTH 40" & 40.5" MEMBRANES.
- 5) ALTERNATIVE MATERIAL 3"SCH 40 PIPE SAF-2507.
- 6) NO ADAPTERS WILL BE SUPPLIED BY PENTAIR FOR DOW MEMBRANES. FOR DETAILS REFER PAGE 2.
- 7) SHELL EXTERIOR COATED WITH WHITE, HIGH GLOSS POLYURETHANE PAINT.
- 8) \*3 EACH FURNISHED WITH LENGTH CODE 4,5,6,7&8.

# **RATING:**

DESIGN PRESSURE......1200 PSI at 120°F
(8.27 MPa @ 49°C)
MIN. OPERATING TEMP........20°F
(-7°C)
FACTORY TEST PRESSURE......1560 PSI
(10.8 MPa)
BURST PRESSURE......7200 PSI
(49.6 MPa)

#### INTENDED USE:

The CodeLine 160E120 Fiberglass RO Pressure Vessel is designed for continuous, long term use as housing for reverse osmosis membrane elements to desalt typical brackish waters at pressures up to 1200 psi. Any make of Sixteen-inch nominal diameter spiral-wound element is easily accommodated; the appropriate interfacing hardware for the element specified is furnished with the vessel.

The CodeLine 160E120 is designed in accordance with the engineering standards of the Boiler and Pressure Vessel Code of the American Society of Mechanical Engineers (ASME) Code.

The CodeLine 160E120 must be installed, operated and maintained in accordance with the listed precautions and good industrial practice to assure safe operation over a long service life.

The high performance Filament wound FRP shell must be allowed to expand under pressure; undue restraint at support points or piping connections can cause leaks to develop in the shell. The end closure, incorporating close fitting, interlocking metal components, must be kept dry and free of corrosion; deterioration can lead to catastrophic mechanical failure of the head.

Pentair Water will assist the purchaser in determining the suitability of this standard vessel for their specific operating conditions. The final determination however, including evaluation of the standard material of construction for compatibility with the specific corrosive environment, shall be the responsibility of the purchaser. Alternate materials with enhanced corrosion resistance are available on special order.

Specifications are subject to change without notice

## **PRECAUTIONS:**

- DO...read, understand and follow all instructions; failure to take every precaution will void warranty and may result in vessel failure
- DO...mount the shell on horizontal members at span "S" using compliant vessel supports furnished; tighten hold down straps just snug
- DO...provide overpressure protection for vessel set at not more than 105% of design pressure
- DO...inspect end closures regularly; replace components that have deteriorated and correct causes of corrosion
- DO...Lubricate seals sparingly, using nonpetroleum based lubricants, i.e. Parker Super O-lube® Glycerin or suitable silicone based lubricants.
- DO NOT... make rigid piping connections to ports or clamp vessel in any way that resists growth of fiberglass shell under pressure;  $\Delta DIA = 0.02$  in. (0.5mm) and  $\Delta L = 0.2$  in. (5mm) for a length code -6 vessel
- DO NOT... hang piping manifolds from ports or use vessel in any way to support other components; branch connection piping may be simply supported between the header and port; maximum weight of branch piping; feed/concentrate 16 lbs (7 kg); permeate 8 lbs (4 kg)
- DO NOT... operate vessel at pressures and temperatures in excess of its rating
- DO NOT... operate vessel without permeate ports internally connected with a complete set of elements and interconnecting hardware
- DO NOT... operate vessel with permeate pressure in excess of 125 psi at 120°F (0.9 MPa @ 49°C)
- DO NOT... overtighten the connection to the permeate port (hand-tighten plus one-quarter turn, check for leaks)
- DO NOT... tolerate leaks or allow end closures to be routinely wetted in any way
- DO NOT... pressurize vessel until double-checking to verify that the retaining ring is completely inside the groove
- DO NOT... work on any component until first verifying that pressure is relieved from vessel

#### **ORDERING:**

Using the chart below, please check the features you require and fax them with your purchase order to our customer service department for expedited processing. For optional materials and/or features not listed below, please consult factory for pricing and availability.

## MATERIAL OPTIONS

- Standard All materials as per drawing 99024 on the first page.
- ☐ Customer specified material of construction.
- (Please consult the factory, as these options will affect pricing and vessel lead-time.)

# PERMEATE PORT FOR 40.5" DOW MEMBRANES

☐ Use 96956 Perm port & 96957 Thrust Ring

For complete information on the proper use of this vessel please refer to the 16" User Guide Bulletin No. 94347
